

MARUHA NICHIRO
GROUP

BRONCHURE

2024|2025

We are Inlet, and for the last 30 years, we have dedicated to **import and distribution of frozen seafood products.**

Since 1993, our aspirational objective has been to focus on **customer satisfaction and provide quality products that offer solutions for their businesses.**

Today, we have achieved our goals.

Thanks to our network of suppliers, **we bring a wide range of products** to the market.

Our ability to adapt, differentiate, and innovate has been key to our success. **The arrival of MARUHA NICHIRO in 2019 has allowed us to manage operations much more quickly and efficiently, adding extra value to our services.**

Quality is one of our top priorities, which is why we implement rigorous controls at every stage of the process: at the source, during transportation, at the destination port, and in our own facilities.

Our track record and the trust our customers place in us reflect our ongoing effort to remain significant in the industry.

 ur logistics operations are based at the **INLET PACK** facilities, located in Puerto de Sagunto (Valencia).

From this cold storage complex, we manage the reception of merchant, storage at -20°C , and **fulfill the demands and orders for over 600 customers**, ensuring delivery conditions.

In 2020, an ambitious project to expand the facilities was launched, and by July 2021, the plant began operating at full capacity.

Currently, they have a **cold storage capacity of more than 60,000 m³**, allowing for the accommodation of **approximately 11,500 Euro-pallets**, providing us with greater supply and service capacity.

The entire logistics and infrastructure is supported by national sales branches (**Barcelona, Burgos, Madrid, Seville, and Valencia**) and commercial offices in **Portugal and Italy**; complemented by our purchasing offices in **India, Vietnam, Iceland, and China**, where product sourcing, monitoring, and inspection are conducted at origin.
